

Our goal at Phoenix arise is to fill in the gaps and a huge gap in services that we see is labour and delivery support for survivors of sexual abuse and sex trafficking and IPV, aswell as court support, doctor visit supports, rape kit supports, post partum support, and support for survivors with system based advocacy.

Currently on staff we have a single person (who is our founder who is trained in these supports along with being a peer support worker and crisis support worker)

Our short term goal is to hire on and help others become trained in these support areas, our goal is to constantly have someone available for all of the survivors we support to have access to these services.

To date we have successfully assisted with emotional support during 1 labour and delivery we would like to expand these services immediately and we are slowly letting other organizations know we offer these supports our goal is to also add a doula to our team in the near future who is also trained adequately in supporting survivors of sex trafficking

We have assisted with 2 post partum recovery support and are still assisting those clients

To date we have done 7 court support

1 rape kit support

We are constantly supporting the survivors we work with system based advocacy this is something we see a huge need to expand urgently

We have supported many clients with doctor and psychiatrist visits

Our long term goal is to be able to partner and let hospitals, police, shelters,courts, children's aid, birthing centers, first responders and front line workers and anyone who might be working with a survivor know we offer these supports

Of course before we are able to do that our goal is to hire minimum 4 new team members each year 2 trained in labour and delivery for the first year

1 trained in systems based advocacy(workers, police, professional,etc) and doctors visits

1 trained for rape kits

With that we can adjust the number of each sector we need to hire according to our growth and need for our services each year

For this we are requesting BLANK AMOUNT OF MONEY
AND THIS IS HOW WE GOT THESE NUMBERS
